WORK & LEADERSHIP EXPERIENCE

Cambria Hotel

Guest Service Associate

Rock Hill, SC

5/24 – Present

- Manage end-to-end customer operations, resolving service issues in real time while ensuring accurate financial transactions and consistent service quality.
- Process, reconcile, and maintain payment, billing, and guest data across internal systems, ensuring data integrity, PCI compliance, and operational efficiency across all touchpoints.
- Partner with leadership to analyze occupancy and financial trends, supporting service recovery decisions, revenue optimization, and process improvement initiatives

National Coalition of 100 Black Women Inc

Student Software Project Manager

Charlotte, NC

8/25 – 12/25

- Led strategic discovery through stakeholder interviews, translating business needs into clear system requirements, user workflows, and success criteria.
- Built system architecture and dashboards to track user progress, reporting, and outcomes, incorporating iterative feedback to improve experience and accessibility.
- Managed project timelines and cross-functional execution for a 6-person Agile team, monitoring progress, resolving blockers, and delivering milestones on schedule.

International Center | Winthrop University Rock Hill, SC

International Ambassador

Rock Hill, SC

8/23 – Present

- Support and execute campus-wide onboarding and engagement programs for international students, improving transition outcomes, clarity, and overall student experience.
- Lead cultural events, workshops, and peer engagement initiatives that promote inclusion, global awareness, and long-term student belonging and retention.
- Guide students through complex administrative processes, including visa documentation and health insurance enrollment, streamlining onboarding workflows to improve access, understanding, and service efficiency.

Office of Residence Life | Winthrop University Rock Hill, SC

Resident Assistant

Rock Hill, SC

8/23 – 8/24

- Served as the primary support contact for a residential community of 200 students, resolving safety, behavioral, and wellness issues with urgency, professionalism, and sound judgment.
- Managed high-pressure incidents using conflict-resolution and crisis-management frameworks, ensuring policy compliance while prioritizing individual needs and overall community experience.
- Worked closely with university leadership to document incidents, coordinate emergency response, and implement engagement initiatives that improved student retention, inclusion, and academic success.

TECHNICAL SKILLS & PROJECTS

Programming: C++, SQL, Python, MongoDB, JavaScript, Microsoft Office Suite, Google Sheets, Jira, Confluence, Asana, PowerBI.

AI Study Companion

- Designed and developed a full-stack AI-powered web application that converts lecture notes into structured study guides, quizzes, and flashcards.
- Integrated AI APIs and engineered structured prompts to ensure consistent and reliable output formats.
- Built front-end user workflows and implemented secure environment configuration, focusing on usability and workflow efficiency.
- Demonstrated applied AI product design by translating a real user need into a functional and deployable solution.

California Wildfire Analysis

- Conducted exploratory data analysis on California wildfire incidents to identify patterns in severity, causes, and financial impact.
- Cleaned and structured large datasets, developed correlation analyses, and built advanced visualizations to communicate insights.

Certifications: Google Analytics Certification
